

Lock Synergy Cylinder Series

LSC-R/M

RIM / Mortise Cylinders

LSC-R

LSC-M

The LSC cylinder series are standard 5 pin ANSI cylinders that can be used in mortise locksets, annunciators, exit devices, outside key control, and many other applications where a cylinder is used.

The cylinders are made of solid brass, with a nickel plated end cap. The pins are precision made, ensuring quality and durability for every day use.

The cylinders can be bought in RIM or mortise, with a Yale keyway. Cylinders can be keyed alike and keyed different, and thumbturns are available upon request.

Each cylinder comes with two keys standard, and the RIM cylinder comes with a mounting kit for outside key control applications.

Features

- 5 pin cylinder
- Available in keyed different or keyed alike between both cylinder types
- Brass housing with brushed nickel plated end cap

Benefits

- Standard ANSI design allows cylinder to be used in most applications
- Durable for every day usage
